Oh!
Let's

look-

The Gladiolus

As we know it today, the Gladiolus easily takes a place in the front rank as one of the most useful and beautiful members of the floral kingdom. It is one of the most easily grown and universally adaptable of all flowers. In its stately majesty and beautiful tints and variety of color blendings it has few equals. In the garden its long season of bloom, together with its great variety of color, form and types, make it one of the most striking and noble of all garden subjects, and it lends itself to all manner and kinds of floral arrangement. It is suitable for a wide range of floral uses and as a decorative subject has few if any equals.

Planting Time is Almost Here

HAVE you ordered all of the Kunderd Gladioli you should have for your garden the coming summer? Just think what a joy it would be to have a nice lot of these flowers to beautify your garden and for use as cut flowers. You will no doubt want gladioli this summer, and if you do not grow them yourself it will be necessary for you to buy the cut flowers, and you know how expensive that is.

If carefully taken care of, Kunderd bulbs will last many years to come. In fact, they increase rapidly so you will have more and more each year—a real investment, besides they are so easy to grow if you will follow my simple cultural instructions as given in my catalog. I believe you already have a copy. If you do not have it I will be glad to send you a copy free. It is very beautifully illustrated in colors. You should send for it, even if you do not buy bulbs, to learn how easily you can grow gladioli in your own garden by growing them the Kunderd way.

GLADIOLI—THE KING OF THE FLOWER GARDEN

*This is the Greatest Offer I Have Ever
Made in Gladioli and Will Meet the
Approval of the Most Exacting Buyer*

MY OFFER TO YOU—

THE almost unbelievable interest shown in my "Surprise Package," which is an offer of 10 choice named varieties, all different in a mixture, but not labeled, the value of which is guaranteed to be \$3.00 or more, if bought under name, for \$1.10 prepaid, has prompted me to extend this offer by offering larger collections in a similar way. You will note that the larger the collection the more I am obliged to ask on the average per bulb, because in making the larger collections I must use many of my most expensive kinds.

Each time I guarantee the catalog value to be very much greater than the prices asked here. I am able to give you the very best I have in gladioli in these wonderful selections at a price that would make wholesale prices seem high, but I cannot furnish you with the names of these varieties at the prices asked. I am put to a great expense to furnish the names of each bulb when ordered separately, and by sending them to you in a mixture I am saved a big expense of separate labeling, and can give you the benefit of this, and more too. My entire catalog lists of varieties will be used in making up these assortments (excepting only *Lacinatus*), besides I have a considerable quantity of new and unintroduced varieties of great value which I intend to include in the larger assortments.

Don't miss this rare opportunity to make your garden a beauty spot in your town.
